STREAM LIVE IMAGES TO ALL YOUR ANDROID AND IOS DEVICES
AT THE SAME TIME!

The MegaVID Wi-Fi 12MP camera is an incredible addition to our camera line. Operating at 5GHz frequency for maximum speed (3840x2160@30fps) the MegaVID can be mounted to nearly any microscope that supports trinocular C-mount and connects to any iOS or Android device through the LW Scientific app. Utilize the MegaVID Wi-Fi to its fullest capabilities using the included software disc to connect to any desktop. The MegaVID Wi-Fi has many applications but is best suited for teaching, training, and educating clients and students.
